## If you are elected will you protect babies, mothers and their families?

I pledge that if I am elected to the House of Commons I will encourage the Government to protect breastfeeding and to protect babies fed on formula. In particular to:

- Strengthen the *UK Infant Formula and Follow-on Formula Regulations* to bring them into line with the *International Code of Marketing of Breastmilk Substitutes* and subsequent, relevant Resolutions of the World Health Assembly

(I understand that the 23 health worker organisations and mother support groups in the Baby Feeding Law Group and the UN Committee on the Rights of the Child have called for this and that the Government's own Scientific Advisory Committee on Nutrition and enforcement bodies have called for promotion of follow-on formula and health claims to be banned alongside the ban on infant formula advertising).

- Support and defend the *International Code* and Resolutions around the world and at the United Nations and other international organisations

(I understand that UNICEF has stated: "*Marketing practices that undermine breastfeeding are potentially hazardous wherever they are pursued: in the developing world, WHO estimates that some 1.5 million children die each year because they are not adequately breastfed. These facts are not in dispute.*")
